## 5 PERFECT BABY PHOTO SET UPS YOU CAN DO AT HOME

You don't need an elaborate studio set-up to shoot great photos of your baby at home. With a little planning, some creativity, and lots of patience, create these 5 baby photo set ups at home to help you capture baby photos you'll cherish for a long time.

BORN: 12 APRIL 2018  
TIME: 5:25 PM  
WEIGHT: 3.1 KG

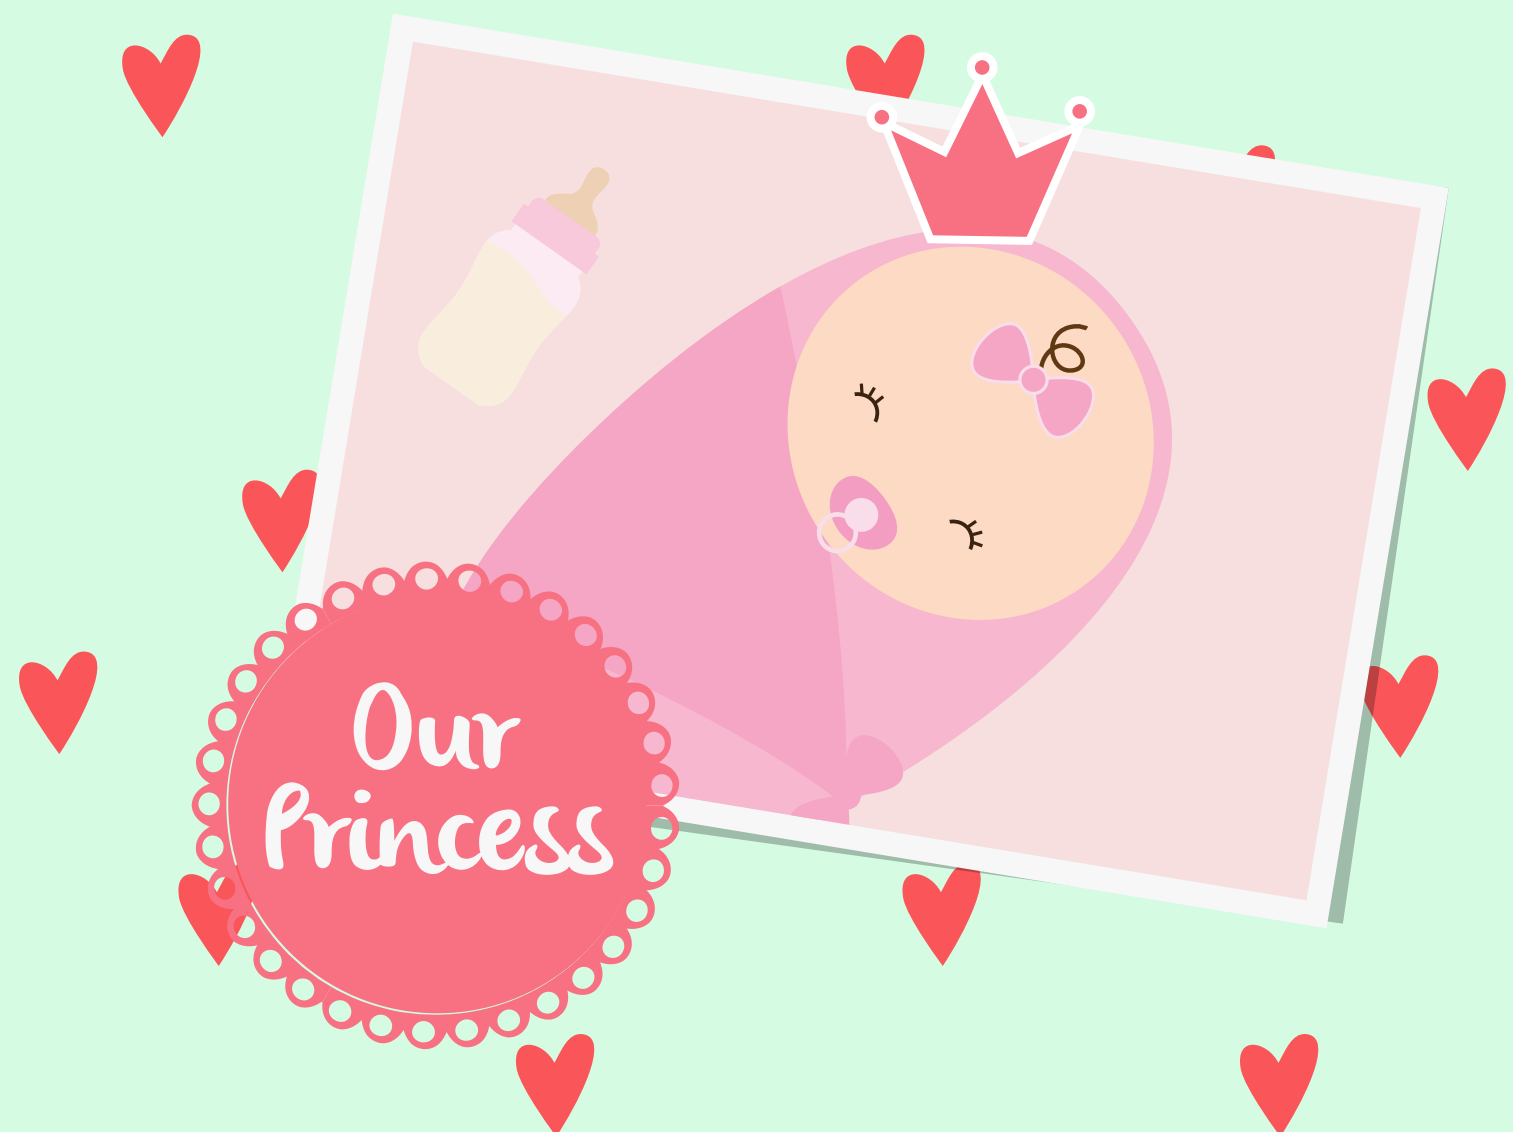

Amber

### 1. PHOTOGRAPH WHERE THE LIGHT IS

Shoot in the room with the most sunlight or look for light from a window. Playing with natural light helps to bring out the most beautiful complexion of your baby's skin. If the sunlight is too strong, diffuse it with a sheer white cloth.

### 2. SWADDLE BABY

Achieve a minimalist look with this simple set-up, which helps her stay warm, feel protected and asleep for a longer period of time so you can shoot more easily. Wrap your baby tight and lay her down on a textured blanket, before you photograph her.

Our Princess

I'm 1 Month old today!

### 3. WRAP BABY IN A BLANKET

Not comfortable with leaving your baby on the bed or floor? Ask an adult to help by holding your baby while they're under a big, bulky blanket.

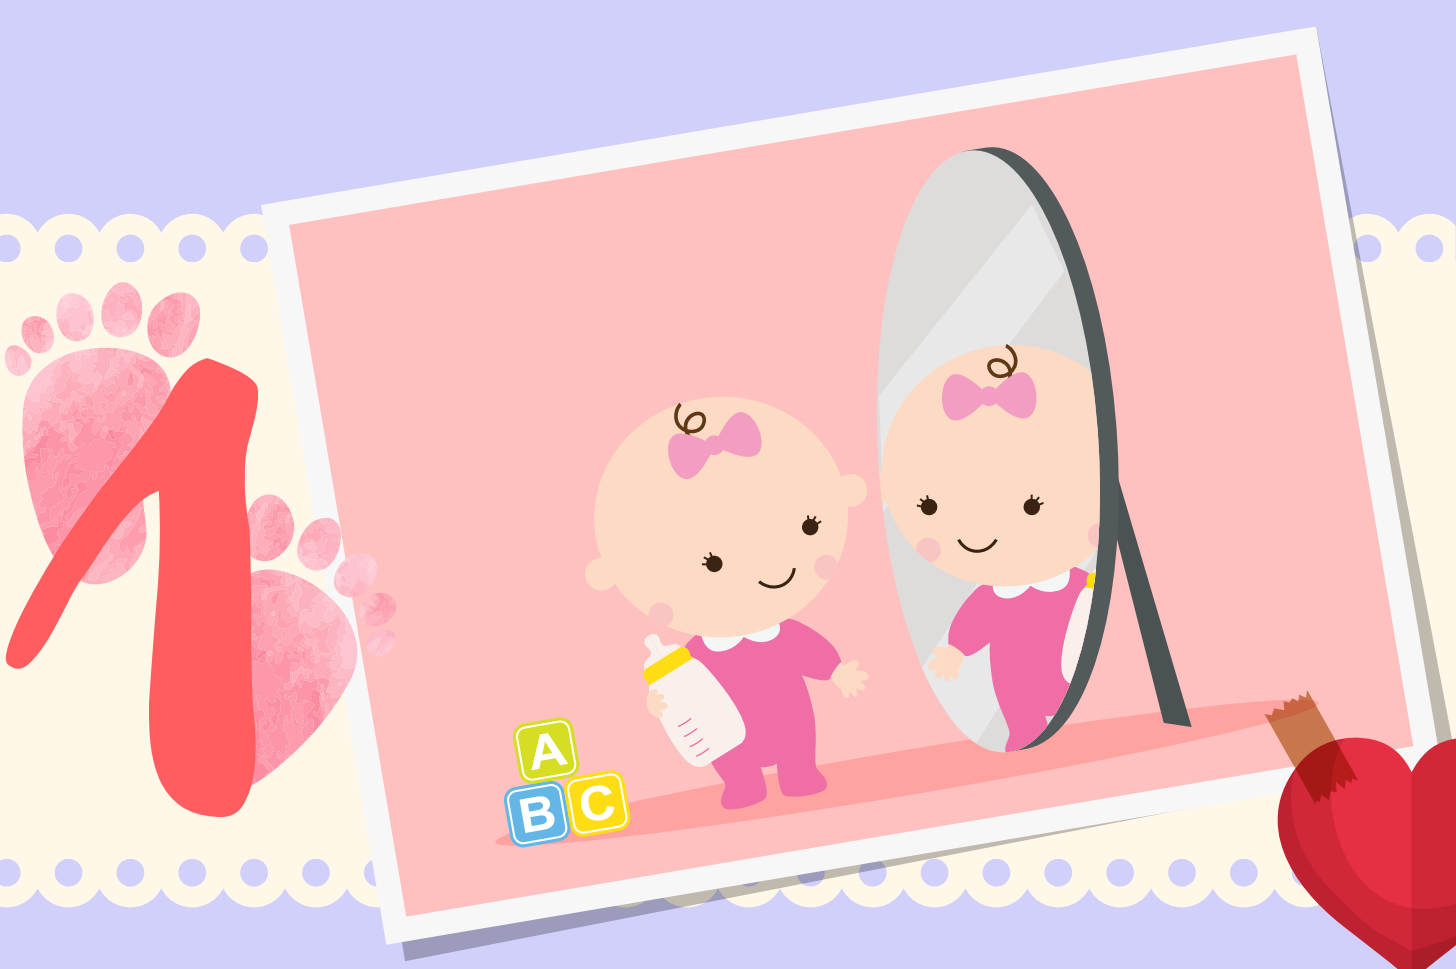

Since photographing newborns can be tricky, this set up helps keep your baby calm and relaxed if she gets cranky.

### 4. HAVE FUN WITH FABRICS

If you and your baby are game for a more creative set up, then sky's the limit. Using bed sheets, blankets, clothing will give you endless opportunities to create various settings. A blanket makes for a great backdrop as it won't wrinkle like sheets or curtains.

JUST TURNED 6 Months!

### 5. PLAY WITH REFLECTIONS

If your baby is a little older and is becoming more curious about her surroundings, include a mirror in your set up. Dress your baby up in a cute outfit, place a mirror in front of her, and get your camera ready to capture all of her expressions while she discovers her reflection.

CHERISH YOUR BABY'S MILESTONES EVEN MORE WITH THESE SIMPLE PHOTO SET UPS
