

# 3 WAYS TO CAPTURE COOL VIDEOS WITH EOS M50

Change the way you create and compose videos with these 3 techniques – time-lapse, reverse, and hyper-lapse – in this handy infographic.

## TIME-LAPSE

A technique that captures a series of photos that shows time passing from minutes, to hours, and whereby the camera is usually static. Great for showing beautiful sequences such as clouds moving and flowers blossoming.

### STEPS

**01** Place the EOS M50 on a tripod and set it to video mode.

**02** Enable the time-lapse movie function and choose a 3-second interval.

**03** Ensure everything is in place and there are no distractions.

**04** Do not move the camera.

## REVERSE

A technique whereby the video or action is shown backwards and sometimes used to bring things 'back to life' or for comedic effect.

### STEPS

**01** Place the EOS M50 on a tripod and set it to video mode.

**02** Enable the time-lapse movie function and choose a 3-second interval.

**03** Reverse the video footage.

## HYPER-LAPSE

Just like a time-lapse, but the camera can be moved over considerable distances. Tip: Always plan the route for your start and end points to ensure a smoother hyper-lapse video.

### STEPS

**01** Enable time-lapse movie function on the EOS M50 and choose a 3-second interval.

**02** Walk a step or two with your monopod and then take a shot.

**03** Ensure the same distance between each shot until the end of your route.

**04** Make sure the route is clear of distractions when shooting your video.

ELEVATE YOUR VIDEOGRAPHY SKILLS WITH THESE TECHNIQUES AND SEE HOW THEY CAN TRANSFORM YOUR VIDEOS.
