

How to take

# CREATIVE PARTY PHOTOS

using your camera's *Continuous Shooting Mode*

— Creative party photos make the experience everlasting! Use these 4 ways to curate interesting party moments with your camera's *Continuous Shooting Mode*.

## Behind-the-Scenes

.1

Be it a baby shower or having a humble 21st at a friend's house, here are some pre-shoot tips to take note of.

### Get Approval and Permission

Due to licensing and inclusion of strangers in the vicinity, shooting with a substantial camera (or a more "professional" looking one) in entertainment establishments can be mistaken to be an action of intellectual property infringement. So make sure you have obtained the required permission from a representative or the owner himself.

### Have a Theme / Dress Code

If you are the host, try implementing a dress code or theme to add cohesiveness to your images. Play with the same family of colours in your decorations to create fitting backdrops.

### Stay Candid

Get everyone to be comfortable with surprise candid shots! It's never the posed shot that makes the night memorable.

## 4 Ways to Take Creative Party Photos using Continuous Shooting Mode

.2

### 1 Human Expression

Glam or 'unglam', capturing human expressions is a great way to add emotions to candid photos. Have the subject do something like the Chubby Bunny challenge where she'll stuff as many marshmallows in her mouth - it'll be worth the cleanup later!

### 2 Ambience

Not just limited to the clinking of shot glasses, you can use continuous shooting mode to capture objects that encapsulate the party. Some can include the cake-to-the-face moment, or the busting of a piñata to make a fun and creative gif.

### 3 In the Moment

Continuous shooting mode lets you capture multiple static photos for a period of time. That means that you can attempt unique moving shots while picking the best one out of them all. Try jumping in the air to create a levitation effect!

### 4 After-Effect

Line your photos together and add different effects during post edits. Try the reversal effect or add humorous context with subtitles, text or emojis.

## Caution

.3

Always be aware of your surroundings. Be careful when swinging your camera as there might be someone behind you. Also, store your camera safely in a protective bag after you're done to avoid any accidental scratches or impacts. Try to use a lens hood and with protective filter as this would help to protect the fragile lens front element - especially during a party.
